**Commenting on results, Mr. Naresh Patel, Executive Chairman & Managing Director, Ami Organics Limited,** said: *“We continue our robust trajectory with 20% YoY growth during Q2, primarily driven by a significant increase in the Advanced pharmaceutical intermediate business which grew by 25% YoY. That said, the Company witnessed a flattish growth in the specialty chemicals business. Our margins continue to strengthen as we keep tight control on cost as well as because of lower freight rates. I believe margins will continue to see the improvement in coming quarters.*

*I am delighted to announce that we have successfully developed Methyl Salicylate using flow technology which is expected to commercialize from Q3 onwards. This shift in manufacturing technology has resulted in a considerable reduction in production time, 3x capacity expansion, and cost savings of around 5-7%.*

*Electrolyte additives continue to see good inquiries from clients across the globe and we expect to commercialize the product before the end of FY23.*

*Overall, I remain optimistic about our business growth in the coming quarters and years on the back of various strong growth levers.”*
